H. BAER, M. D.
ELSINORE, CAL.

December 4, 1922.

Prof. Philip A. Munz,
Pomona College.

Dear Sir:

Your letter received today, and I am very glad to make your acquaintance by letter and hope to make it in person in the near future. I am but an amateur botanist, but have been working in this section for the past two years, getting together an herbarium, and, because of the lack of books covering this particular region, have found it quite difficult at times to arrive at definite decisions as to the specimen in hand. I should very much like to have some botanist look over my herbarium and point out the errors that I have made, for I feel certain that many errors have been made, for no one has ever looked over it, and I have been forced to rely upon my own opinion in each case.

I live alone, my daughter being at college in the east, in a very large house in Elsinore, so have the greatest amount of room at my disposal, and should be very glad if you could come over some week end and pay me a visit, bringing your family, if you have one, as there is ample room to take care of it, no matter how large. My office is in the same building with the office of the Southern Sierra Power Company, but any one in town can direct you to either my house or my office.

Hoping to be favored by a visit from you at some time in the near future, I am,

Sincerely,

H Baer.
